

Effects of palaMOUNTAINS Revive on transepithelial electrical resistance of Cultured cells

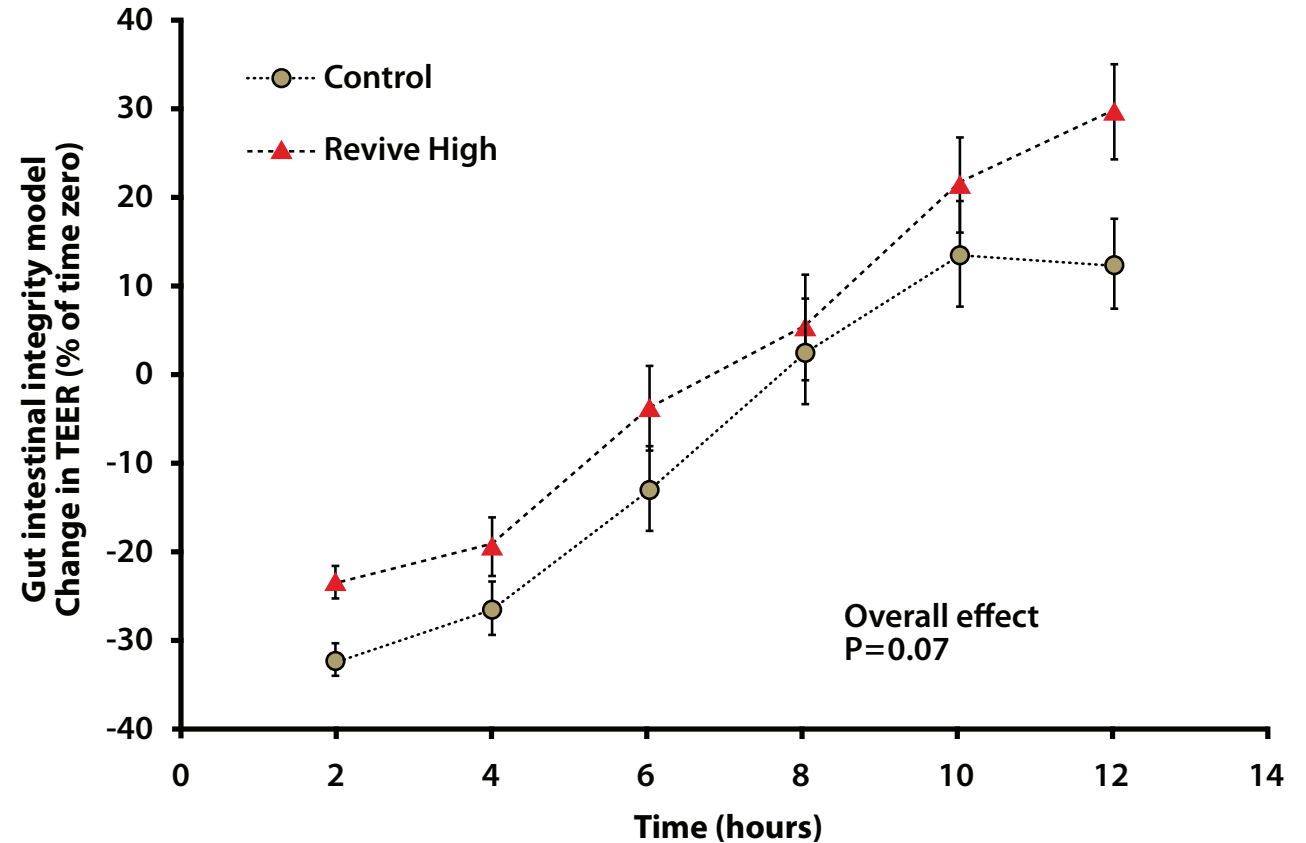

TESTING

The AgResearch trials revealed palaMOUNTAINS Revive® improved gut integrity.

Revive® provided far better barriers to pathogens and better utilisation of feed avoiding wastage, which all added to improved bottom line profit.

After using the palaMOUNTAINS Revive® product, AgResearch trial revealed a 20% improvement in the transepithelial resistance of cultured cells - all these aspects were vastly improved.

palaMOUNTAINS unique formulation has successfully produced palaMOUNTAINS Calf Boost - for calves, palaMOUNTAINS Revive - for the transition period and palaMOUNTAINS MAX Plus - for producing/lactating cows.
